## Leads again with new TV Camera channel

A new vidicon camera channel, which offers considerable economy of operation, and has been specially designed to meet the needs of broadcasting organisations in the United Kingdom and overseas, has now been added to the E.M.I. range.

Known as the Type 201, the new camera channel utilises printed circuits and plug-in techniques to reduce size and weight to a minimum.

The Type 201 is particularly suitable for interviews, live news programmes and other studio work where the use of a larger Image Orthicon or CPS camera is not justified. It produces broadcast quality pictures on 405, 525 and 625 line standards, and is designed for use with E.M.I. vidicon tube 10667S or equivalents.

Used in conjunction with E.M.I.'s control panel type 216, the camera can be operated remotely, allowing several channels to be controlled from a single position.

The Type 201 camera channel has already been ordered by broadcasting organisations in the United Kingdom and overseas.

Type 201 camera channel features include:

- \* Four lens turret with precise detent indexing.
- \* Optional remote control of focus, turret, and lens aperture.
- \* Light weight and compactness. Built-in 7" viewfinder.
- \* Two isolated composite or non-composite outputs.
- \* Complete accessibility provided by use of detachable printed cards.
