

Harris' new TC-85 upstages all other automatic cameras with...

# THE 45-SECOND MULTI-CAMERA SETUP

In less time than a standard commercial break, Harris' new auto setup computers can simultaneously run a pre-production setup of all the TC-85 cameras in your studio.

With independent microcomputers in each camera, fine registration, black balance, white balance, gamma and flare are automatically checked and adjusted in all cameras—in less than 45 seconds! Full computer setup from a new tube installation is also accomplished quickly.

The independent microcomputer concept—a Harris exclusive—eliminates camera interdependence and enhances reliability.

The ASU-85 computer setup system is standard in the new TC-85 camera. It can also be added, at

a surprisingly low cost, to all existing TC-80 series cameras in the field, and is fully compatible with the Harris Triax system. You can teach your older cameras new tricks!

Compare the cost. The TC-85 camera with full computer setup is priced well below competitive models.
