

*The New*

**3" IMAGE  
ORTHICON  
TV CAMERA**

*4½" also available*

Exact standards of design have resulted in a high-grade camera capable of reproducing the fine picture quality demanded in studio use, yet, at the same time, light and strong enough for field use.

**OUTSTANDING FEATURES:**

- ★ Pick-up Tube can be replaced in one minute without disturbing cover or lenses.
- ★ 'Image orbiting' device reduces risk of target 'burn-in'.
- ★ Built-in hour meter records pick-up tube running hours.
- ★ Electronic viewfinder with 7" diagonal rectangular tube. It presents a picture which is perpendicular to the line of vision.
- ★ All chassis of plug-in type for easy maintenance and replacement.
- ★ Servo control of light by filter or iris.
- ★ Thermostatic temperature control of pick-up tube.
