Power supply 105 to 125 volts 45 watts

Data

Line standards 625/50 525/60
Colour standards Monochrome
Drives or locking Free run
Weight * 12 Lbs.
Colours Cyan
Dimensions * 200H x 150W x 300L mm.
Date designed Circa 1960
Dates used
Used by

*Excluding Lens & Viewfinder

Developments

7 valves and a transistorized video amplifier, interestingly the video amplifier has a cover marked "warranty void if removed". It seems they were concerned about the new technology.

Notes

I include this CCTV camera here for two reasons, I have one in the collection and it is a nice well built camera with hybrid construction in the late 1950s American construction style.
