

203

For versatility in camera channels

E.M.I. ELECTRONICS LTD

BROADCAST AND RECORDING EQUIPMENT DIVISION
HAYES · MIDDLESEX · ENGLAND

Telephone Hayes 3888 Cables: Emidata London

The E.M.I. Camera Channel Type 203 is unique in possessing all the following features:

- * Designed to operate with 4½ inch Image Orthicon pick up tubes with the facility of rapid interchange to 3 inch Image Orthicon or pick up tubes if required.
- * Five position turret including one special position providing facilities for: easy withdrawal of pick up tube through turret without opening camera sides; and mounting of diascope or any type of lens.

E.M.I.'s new 203

- * Will accommodate TTH Studio Varotal or Zoomar Zoom lens without modification.
- * Operation on any one of the following systems by simple change of plug connectors:
 - 625 lines to CCIR/OIR Standards
 - 525 lines to IRE/EIA Specifications
 - 405 lines to BBC TV80 Specification
- * Extensive use of plug-in printed wiring units provides very good accessibility, and ease of maintenance.
- * Special quality valves and high stability circuits eliminate need for adjustment over long periods of operation.
- * Remote control of lens apertures by easily detachable servo mechanism.
- * Optional preset filter wheel, electronic Image Orbiting and hour meter.
