# UNANIMOUS DECISION

...EMI CAMERAS CHOSEN FOR TEDDINGTON!

When ABC selected the fifteen camera channels for their Teddington Studio, they did so with considerable care.

For the first time all available British cameras were subjected to exhaustive trials under studio conditions. Tests were made, results were analysed, EMI cameras were chosen.

In reaching their decision, ABC sought the opinions of their video operating staff, production staff, camera men, maintenance engineers and planning engineers. Their collective opinion was that the EMI cameras were the best for their requirements.
