Associated equipment

The Link-NEC 100 is a companion portable for the Link 130. There was a large viewfinder, a local remote control panel and an autasetup unit that attached to the camera in some way.

Features

Auto black, white, beam, flare, centering, automatic line up could be added to any mode. Programme microphone circuit. Variable gamma, linear matrix.

Notes

There is complete interchangeability of heads and up, to 8 cameras can be controlled from the same master setup panel. It has the same matched colour response as the Link130 and the same 18mm. Plumbicon tubes.
