

**The new Mk. III Camera
with 4½" or 3"
image orthicon
tube . . .**

The use of the new Marconi camera BD 687 with 4½" or 3" image orthicon tube and the employment of better circuit techniques in the camera channels have reduced to a negligible degree such faults as black halos, edge effects and electronic ghosts; whilst resolution, grey scale and signal-to-noise ratios are greatly improved. Ingenious design has led to simplicity of control and provided for fully remotely controlled applications.

Besides the camera the channels BD 808/809 comprise a Camera Control and Preview Monitor, Regulated Power Supply Unit and Focus Supply Unit.

MARCONI

**Complete Broadcasting
and Television Systems**

Marconi equipment has been installed in every one of the BBC Television transmitter stations and in the USA, South America, Canada, Italy and Thailand.
