CEI-290 BACK PACK COLOR TV CAMERA

Configured for back-pack operation, the CEI-290 includes four discreet packages: camera head with standard 10:1 Angenieux f2.8 lens; back-pack/electronics unit; detachable viewfinder and Bell hip pack mounting adaptors; and camera control unit (CCU), including NTSC encoder and operating control panel.

Special design features permit the interchangeability of CEI-290 and CEI-280 camera control units, for greater flexibility, more efficient maintenance, and cost advantages.
